Tracware Product Overview

Intelligence Dashboard

Brings key operational and business performance into one place, giving teams a clearer view of activity across their organisation.

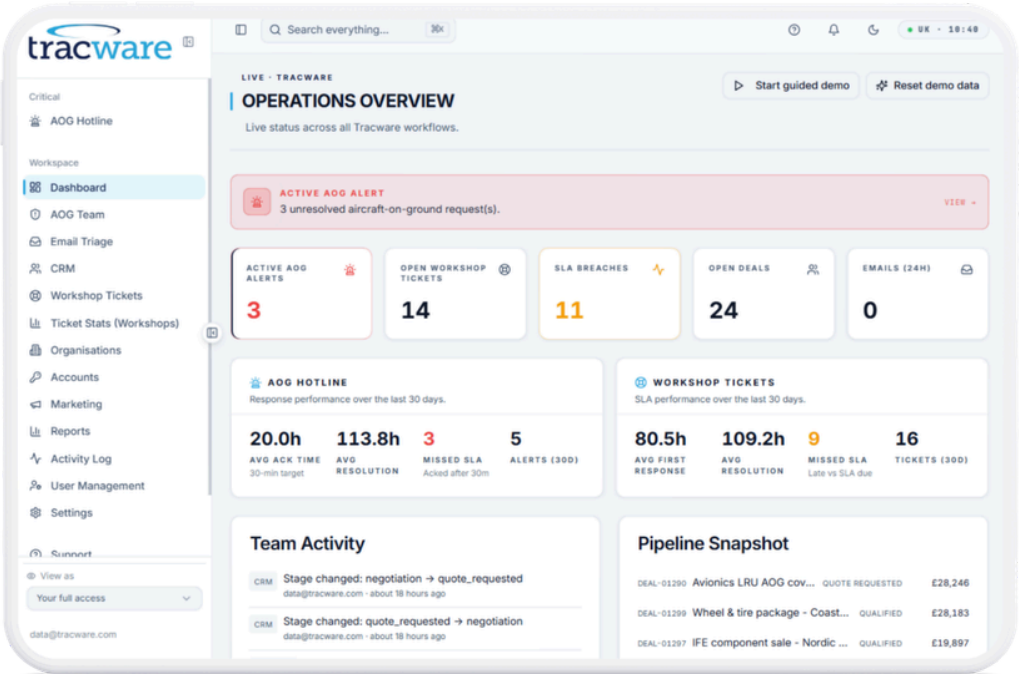

- Track KPIs across Operations, Warehouse & Logistics, Finance, Quality & Warranty, Commercial and much more
- Monitor current performance, trends, backlogs and areas requiring attention
- Drill into underlying activity to understand what is driving individual metrics
- Bring cross-functional reporting into a consistent management view
- Support faster, better-informed operational and commercial decision-making

MRO Hub

The MRO Hub uses AI to give sales and customer-facing teams a structured way to manage enquiries, quotations and active work without direct ERP access.

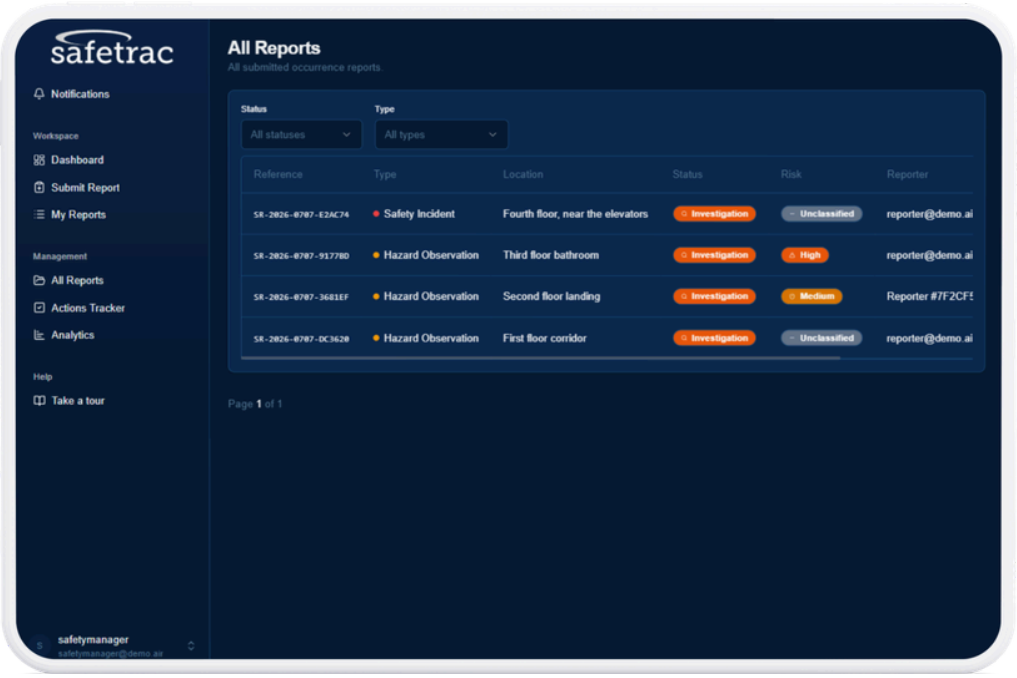

- Triage incoming customer emails and route them appropriately
- Manage quotations and coordinate departmental input
- Pass accepted work into your ERP for operations teams
- Give customer-facing teams access to current job status
- Improve oversight of enquiries, pipeline activity and ongoing customer communication

Safetrac

A browser-based aviation Safety Management System designed to make safety reporting, follow-up and oversight easier for safety teams.

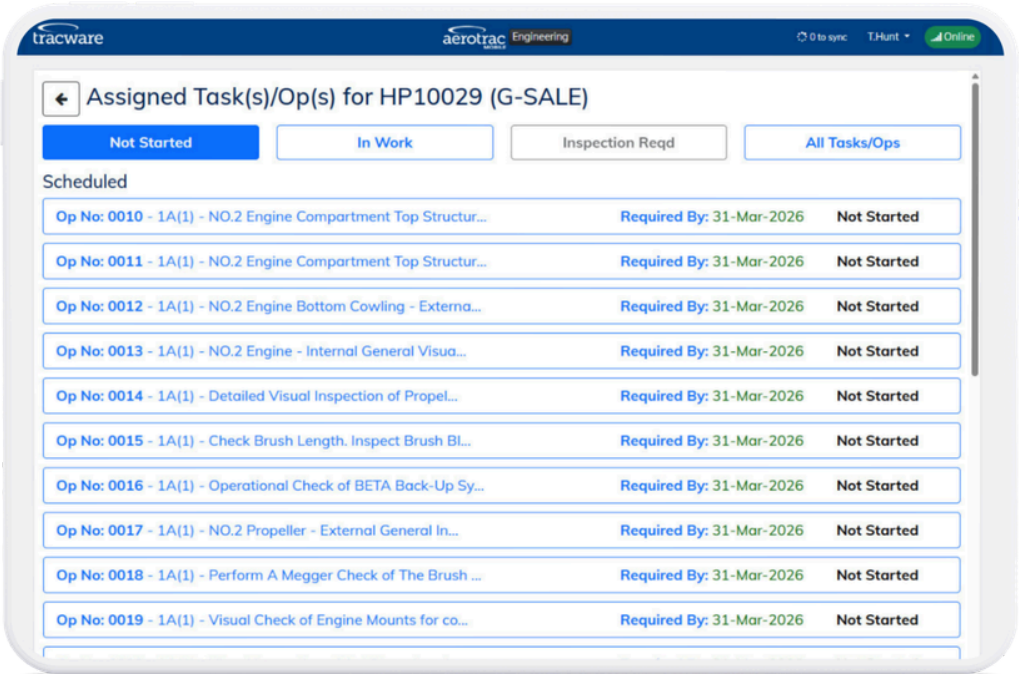

- Support up to 250 users across the organisation
- Manage hazards, incidents, near misses, investigations and corrective actions in one place
- Built around recognised aviation safety requirements, including ICAO, EASA and FAA frameworks
- Give Safety Managers a clear, straightforward way to review reports, assign actions and track issues through to closure
- Maintain stronger oversight through structured risk assessment, audit history and safety trend visibility

Aerotrac Mobile: Engineering (ATM-E)

A mobile engineering app that gives engineers access to key Aerotrac workflows at the point of maintenance, helping them manage assigned work without repeatedly returning to a fixed workstation.

- View assigned workcentres, projects, aircraft and tasks
- Start, update and complete engineering work from the point of maintenance
- Access publications, manuals, work instructions and project information
- Request parts and tooling, raise defects and record inspection activity
- Keep engineer activity aligned with Aerotrac as work progresses
